

Final Deliverables Documentation

Project Name: Nabd – AI-Powered Clinical Decision Support System

Client Name: Ministry of Health / Healthcare Facilities

Date: December 21, 2025

Prepared by: Seif El-Din Mohamed

Contact Information: [01223817860]

1. Project Overview

Description: Nabd is a specialized medical platform I've developed to help healthcare providers make more informed clinical decisions through AI integration.

- **Objective:** The main goal was to boost diagnostic accuracy while keeping all patient medical records in one centralized, easy-to-access system.
- **Scope:** My work focused on building a scalable Backend using **.NET 8** and **Clean Architecture** to ensure the system is maintainable and ready for AI model updates.

2. Final Deliverables

Deliverable	Format	Description
Backend Source Code	ZIP File	The complete source code built with .NET 8 and Clean Architecture.
Database Schema	SQL Script	Full database structure including tables for patients, doctors, and AI logs.
API Documentation	PDF Document	A comprehensive guide for all API endpoints and integration steps.
UI/UX Design	Figma Link	The interactive prototype and design system for the clinical dashboard.

3. Explanations and Instructions

Usage Instructions: To run the system locally, please follow these steps:

- **Step 1:** Extract the source code and open the solution in Visual Studio 2022.
 - **Step 2:** Run the SQL script in your SQL Server Management Studio (SSMS) to set up the database.
 - **Step 3:** Update the `ConnectionStrings` in the `appsettings.json` file.
 - **Step 4:** Build the solution and run the project to launch the Swagger API documentation.
-

4. Feedback and Revisions

Feedback Request: Please provide your feedback on the final deliverables by **January 5, 2026**. Any necessary revisions regarding the API performance or UI elements can be discussed after your initial review.

5. Closing Remarks

Thank you for the opportunity to work on this project! I appreciate your collaboration and support throughout the development phases. If you have any questions or need further clarification regarding the deliverables, please feel free to reach out.

Looking forward to our future collaboration!
